## Getting ready for your rheumatologist visit guide

Step 1: Fill out this rheumatologist visit guide and take with you to your next appointment.

Step 2: Use this guide to help you discuss your rheumatoid arthritis symptoms with your doctor.

Step 3: Ask your doctor any questions you may have about your current treatment – and if other treatment options could be right for you.

□ GP				Analgesics (pain relief medication)	
Rheumatol	oaist			NSAIDs (Anti-inflammatory medication)	
Both GP an	0	cologist		Corticosteroids	
			DMARDs (like methotrexate)		
Notes				Biologics	
How long does your morning joint stiffness last?			Not	Notes	
Up to 30 minutes			Be sure to bring a list of all the medications you take,		
30 minutes to 1 hour		incl	uding the dosage.		
☐ More than 1 hour  Notes			Tell your doctor if you have or have had any of the following:		
				An infection, including a long-term or localised	
How difficult is it for you to manage daily activities			_	infection (for example, leg ulcer)	
that require full body movement - like getting in and out of bed, bathing, and drying yourself, or walking outdoors on flat ground?				A history of recurrent infections or other conditions that increase the risk of infections	
Not difficul	t			Tuberculosis, or if you have been in close contact w	
☐ Somewhat difficult				someone who has had tuberculosis	
☐ Very difficult				Hepatitis B virus, or you suspect you may be infected	
Notes				A fungal infection	
How difficult is it for you to manage daily activities				Multiple sclerosis and other demyelinating disease	
that require small motor movement - like tying shoelaces, doing up buttons, turning faucets on				Allergic reactions such as chest tightness, wheezing	
or off, or lifting a glass to your mouth?				dizziness, swelling or rash	
☐ Not difficult				Blood disorders	
□ Somewhat difficult				A suppressed immune system	
☐ Very difficult					
Notes				Heart conditions including congestive heart failure, heart attack or worsening of existing heart condition	
What are your symptoms?				Cancer or autoimmune disease	
ly joints hurt	Myj	oints are swollen		Kidney or liver problems
